TECHNICAL SKILLS

Ruby, Rails, JavaScript, ES6, React.js, Redux, SQL, PostgreSQL, AJAX, jQuery, CSS, HTML5, AWS S3

PROJECTS

Questions (Rails, React, Redux)

[Live](#) | [GitHub](#)

App inspired by Quora. Built on Ruby on Rails and React

- Encrypts password with BCrypt for custom authentication
- Populates jBuilder views from RESTful JSON APIs to serve data into the React UI
- Uploads images to AWS S3 using Paperclip and Figaro to crop large files and securely configure an app

The Dots (JavaScript, Canvas, CSS3)

[Live](#) | [GitHub](#)

A browser game built on JavaScript, HTML5 Canvas and jQuery

- Uses HTML5 Canvas for draw graphics
- Calculates capture areas using DFS graph traversal to find optimal routes
- Develops AI algorithms that choose tactics depending on board situation

The Rails

[GitHub](#)

A Ruby MVC Framework

- Handling HTTP requests either using rendering or redirecting to a specific page, or returning errors
- Rendering templates: allows to render html.erb templates
- Routing: dispatches the requests to the correct controller and action method
