- Tested internal CRM system, used JIRA for bug tracking
- Resolved technical issues and educated customers on product

PROJECTS

Superheroes
(JavaScript, React, External APIs)

Web app for searching superheroes

- Leveraged Marvel API to fetch list of 15 most popular superheroes, sorting in descending order
- Displays superheroes in 500 miles from Boston, sorting by the distance
- Uses Google Maps API to display user searches for nearest superheroes

Live | **GitHub**

Magazon
(Rails, React, Redux)

Online store - clone of Amazon

- Built functionality within shopping cart which changes item quantity and cost in real-time
- Implemented user recently viewed items functionality, enhancing shopping experience
- Developed products frequently bought together functionality to increase potential sales

Live | **GitHub**

Command Line App
(Rails, React, Redux)

Terminal command line simulator

- Implemented commands functionality for the basic command line commands
- Created all errors handling on the front end to decrease amount of DB calls
- Added console styling to improve user experience

Live | **GitHub**

Questions
(Rails, React, Redux)

Web app inspired by Quora

- Customized front and backend authentication leveraging BCrypt encryption
- Implemented internal messaging system to enhance user experience
- Reduced page load time storing user images through AWS S3 using Paperclip and Figaro

Live | **GitHub**

The Dots
(JavaScript, HTML Canvas)

A two-player browser game

- Used DFS graph traversal to find optimal routes, resulting in enhanced calculated capture areas
- Created computer player AI algorithm that choose tactics depending on board situation
- Mapped dot drop points to nearest grid intersection for convenient gameplay

Live | **GitHub**

The Rails
(Ruby)

A Ruby MVC Framework

- Leveraged Rack middleware to handle HTTP requests and generates responses
- Utilized RegEx to create routes and respond with appropriate controller action
- Defined ControllerBase class that supports sessions, flash, and redirects and renders erb templates
