TECHNICAL SKILLS

Ruby, Rails, JavaScript, ES6, React.js, Redux, SQL, PostgreSQL, AJAX, jQuery, CSS, HTML5, AWS S3

PROJECTS

Questions (Rails, React, Redux)   **Live** | **GitHub**
App inspired by Quora. Built on Ruby on Rails and React
- Encrypts password with BCrypt for custom authentication
- Populates jBuilder views from RESTful JSON APIs to serve data into the React UI
- Uploads images to AWS S3 using Paperclip and Figaro to crop large files and securely configure an app

The Dots (JavaScript, Canvas, CSS3)   **Live** | **GitHub**
A browser game built on JavaScript, HTML5 Canvas and jQuery
- Uses HTML5 Canvas for draw graphics
- Calculates capture areas using DFS graph traversal to find optimal routes
- Develops AI algorithms that choose tactics depending on board situation

The Rails   **GitHub**
A Ruby MVC Framework
- Handles HTTP requests either using rendering or redirecting to a specific page, or returns errors
- Renders templates: allows to render html.erb templates
- Dispatches the requests to the correct controller and action method

---
